

ST. THOMAS OF CANTERBURY C OF E JUNIOR SCHOOL
“Realising the potential of every child within a caring, Christian community”

Geography Intent Statement

Our Geography studies aim to inspire our children to develop a fascination for the world in which they live. The curriculum is designed to develop knowledge and skills that are progressive, transferable and secure independence. As a result, they will enable children to achieve their full potential, developing inquisitiveness through research and investigation of concepts, knowledge and skills. Through studying and comparing their own location with others including the humanistic and physical features, our pupils will have an understanding of the world’s diversity, cultural wealth and their responsibility and place within it. This will support them in being life-long learners through curiosity and questioning and enrich their journey into secondary school and later life.
